- Light work, Light accessories, Door fixing, AC, Painting, Door lock, AV rack, Water supply, Tiles, Poster, Door, Carpet, POP false ceiling, Recliner, Switch boards, other electrical work and apart from seating arrangement are from customer side only.
- Door and AV rack will be done by in-house carpenter.
- **GST charges EXTRA.**
- **GST charges on all other things is 18% & on Projector 28%.**
- Warranty covers as per the brand norms.
- Cable is sold as per actual requirement on site, i.e., Speaker cable, HDMI cable & Sub-woofer cable.
- Delivery of materials will take maximum 7 working days from the date of approval along with 50% of advance payment, 40% before dispatch of materials and 10% after the installation.
- Carpet /Sanitary / Hardware and Electric electrician goods will be provided by Client Side.
- Transport and Flight charges will be charged by client Side.
- Supply of framing and fabric installation of 12mm gripper onto ply batons will be provided by client. (Additional carpenter work in client's scope)
- Supply and installation of Acoustic infill and foam between the batons will be provided by AV CORE.
- The prices quoted are based on ex-site basis.
- All the civil, carpenter, electrical and air conditioning work will be in client's scope.
- In-case of any variations in the order quantities/measurements, we may have to re-quote the prices.
- Safe and secure storage space for materials to be provided by client.
- Scaffolding with the planks/ladder to be provided by client.
- Uninterrupted electricity, water, lighting, wiring points to be provided on the location without any cost.
- All wet work should be completed before handing over the site.
- Isolated dumping rubber should be provided from client side.
- No returns/ claims shall be entertained
- Prices are subject to change due to volatility in Forex Market & Valid only for 15 Days from the date of Quotation
- Quotation may change later if non-Availability of Stock with Company or Out-dated Modes from Company.
- UPS Supply / voltage stabilizer with surge suppressor is strongly recommended to prevent problems due to Voltage fluctuations, power failure etc. In scope of client.

TERMS & CONDITIONS: -

Terms & Conditions

Product	Instruction
Smart Touch Switches	• Infinity Series switches will be installed on BuildTrack concealed boxes only, while the Designer Series can be used with Indian standard concealed boxes. • Once the glass plates and frames are sent for production, any requests for changes in colour or design will incur additional charges. • The client is responsible for the installation of concealed boxes and/or plywood cutting according to the specified sizes for each site. • Custom icons will be on chargeable basis.
Nodes	• A dedicated power supply is required for the device to draw power. Typically, a live and neutral connection is branched from the main supply to the load. • Adequate space is required inside the backboxes for nodes.

Network Setup

- A Wi-Fi network with 2.4 GHz frequency and WPA2/PSK encryption is essential.
- No BT devices shall be configured directly on the ISP-provided router.
- Customer must opt for BuildTrack recommended network devices only for seamless experience for IoT device operation.
- BuildTrack Team will recommend network devices only for seamless experience for IoT device operation or the existing set of router and APs needs to get approval from the Network Admin team.
- Ensure installation locations have adequate network coverage; dead zones can prevent device operation.
- While router models can be suggested, BuildTrack is not responsible for network maintenance or service.
- Do not change the SSID or password for the 2.4 GHz band of the router configured with BuildTrack devices, as this will disrupt the system. If modification is necessary, contact BuildTrack Support (charges may apply).
- Ensure the router can support the total number of connected devices (BuildTrack and other smart devices). If not, a router upgrade may be necessary.
- Each installation area should be within Wi-Fi range, with RSSI values between 0 and -55 for stable operation. If Wi-Fi needs extending, access points must be added (at client's cost).
- BuildTrack devices must be configured and used on the main network, not on guest networks.
- Under no circumstances shall Wi-Fi extenders be used for our BT system, as they have been found to cause erratic behavior and system failures. • Notify us in advance if a firewall is present, and ensure the device MAC ID is added to the firewall exceptions for configuration.
- No discounts/AMC/Warranty will be applicable on these Network devices (Routers , Access Points , Network Switches).
- Warranty on Network devices will be provided by OEM.
- The client is responsible for providing the Wi-Fi network. BuildTrack offers guidance on recommended network setup.
- If clients do not follow the recommendations, BuildTrack is not responsible for the failure of IoT devices operations.

Installation Setup

- Electrical & Automation wiring, Back Box fitting falls under customer's scope.
- Complete setup of BT devices in the Smart BT App for all household members.
- One time setting up of Scenes/Profiles and schedules for the client
- Comprehensive walkthrough and quick training for all household members.
- Set up of Amazon/Google home devices with BT Automation, as per the client requirements.
- If there are any changes to products either post-production or post-delivery to the site, then an assessment will be made to determine applicable additional cost that will be payable by the customer.
- AFTER hardware installation, if the location of the product is required to be changed by the customer and requires removal and re-installation then, an assessment will be made to determine applicable additional cost that will be payable by the customer.
